CATCH THEM YOUNG - HARD RAIN POSTER EXHIBITION AT BASELIOS
MATHEWS II COLLEGE OF ENGINEERING, SATHAMCOTTAH on 18
Nov. 2020

The Hard Rain Project (HRP), founded in 2005 addresses the broad challenges of climate change, poverty eradication and the environment. It works with world-renowned artists, scientists and communicators to bring its message to students at schools and universities, and to a wider public, through exhibitions, books, films, talks and events. HRP's founder, Mark Edwards, is one of the most widely published photographers in the world, recognized as the first to specialize in sustainable development issues.

The original "Hard Rain" exhibition is a collaboration with singer and songwriter Bob Dylan. It features a 60-metre long outdoor display in which each line of Dylan's song 'A Hard Rain's A-Gonna Fall' is illustrated with world-class photographs bringing global challenges alive in a moving and unforgettable way.

More than 15 million people have already seen the exhibitions at over 150 venues worldwide, including in city centres, botanical gardens, more than 50 universities and schools and at the UN Headquarters in New York. Talks have been presented at universities in all world regions and in places as diverse as national parliaments, prisons, companies and at leading music and arts festivals.

After the exhibition at St Cyril's College, The PG Dept of English, decided to carry the message to youngsters capable of spreading the message of environmental stewarding by organising it at Marthoma Mathew II Engineering College and also for students of CT Eapen Memorial HSS, Sathamcottah. The exhibition was organised on 18 Nov 2019 at 2.00 p.m. Rev Fr Philip Tharakan delivered the keynote while HG Zacharia Mar Anthonios Metropolitan of Kollam Diocese of Malankara Orthodox Church inaugurated the exhibition.

Extension Activity Report on Water Analysis 2020-21

The Department of Chemistry of St. Cyril's College conducted an extension activity to analyze the quality of drinking water.

The final year students were divided into various teams and collected drinking water from nearby places of the college. The analysis was carried out by the students under the supervision of department faculty. The parameters like (alkalinity, turbidity, pH, TDS, DO, salinity) were checked in our laboratory using Water Analyzer 371 (Systronics). The reports were distributed through proper channel to the persons concerned.

Report of Extension Activity 2020-21

Department of Economics has organized an extension activity on Energy conservation practice. Energy conservation preserves the precious energy sources like conventional energy sources. It helps to improve the environment green. Energy conservation is the need of the hour. Energy conservation reduces the need for the energy services and can result in increased environmental quality, national security, financial security and higher savings. It also lowers energy costs by preventing future resource depletion. We used to give LED bulbs to reduce energy cost and electricity bill for the purpose of energy conservation. Energy conservation can be done with the help of giving LED bulbs rather than filament bulbs

With the cooperation of students, we selected a village area near the college. We went to that backward area and distributed LED bulbs. LED bulbs can be used for the energy conservation. We gave an awareness of disadvantages of filament bulbs. We promoted the use of LED bulbs instead of filament bulbs. We made a campaign on energy conservation explaining the need of the use of LED bulbs instead of filament bulbs. We gave awareness for using LED bulbs because of its energy saving capacity. The economic advantage of LED bulbs is that it can reduce electricity bill amount. The use of LED bulbs reduces the use of non renewable energy sources like electricity. LED bulbs reduce energy cost and the use of non renewable energy.

We distributed LED bulbs to 23 households on 11/01/2021. These bulbs are energy saving and creates economic advantage. The households welcomed the activity very much and supported it. Students actively participated to conduct this

14) October 1- Asraya visit

October 1, celebrated as the International Day for the Aged was celebrated by visiting Gandhi Bhavan at Adoor, a place where the aged are taken care of. Two representative volunteers bought Rice, Wheat and other essential supplies to be taken to Gandhi Bhavan. As there were restrictions of covid, only the Programme Officers and the two Volunteers could enter the Old Age Home. The supplies were handed over to the in charge Shri Santhosh in the presence of the inmates. It was a happy occasion.

Class on the importance of Nutrition conducted for the women of the Kudumbasree (as part of international women's day celebrations)

On 8th March 2021, the students of the college created awareness among women especially the lady staff of the college about the necessity of using microgreens which can be cultivated at home. Taking this as the signature line of the programme, volunteers distributed seeds among the staff which could be grown as microgreens. There was also a class on Nutrition conducted for the women of the Kudumbasree Unit of the locality. The programme was inaugurated by the member of the Panchayath Ms Mariamma Tharakan. Ms Saraswathy, nutritionist lead the class. Microgreens were also distributed among the women present.
